32 YEARS

Growing Hardy Plants for Northern Gardens

THIRTY-TWO years ago, when the Holm & Olson organization started as pioneers in the business of growing fine nursery stock, it was evident that successful plantings could result only from stock thoroughly acclimated to the soil and climatic conditions of the central and northwest region. Our nurseries were established to provide our customers in this section with the hardiest of plants, grown in a manner to produce the excellent landscape effects and immediate showing for which our products are noted. Thirty-two years of successful enterprise attests to the soundness of this policy and the value of our service and products.

H. & O. QUALITY PLANTS INSURE SUCCESS

Growing Hardy plants for northern gardens includes in its meaning the growing of hardy plants in a manner to insure successful planting. H. & O. plants are not crowded in the nursery. They are given room to develop size and shape, and are transplanted to develop an adequate root system. Plants are not marketed until they reach the H. & O. standard of quality. This proper growing and careful handling of all our plants insures your success in landscape planting.

VISIT OUR NURSERIES

Come to the Park Nurseries and see the stock. You will find a larger list of varieties than in any other nursery in the West. Personal selections can be made, and our Superintendent, who conducts you, will tag the specimens. At the proper planting-time, they will be carefully dug and shipped.

The nurseries, at 1200 St. Clair Street, St. Paul, are easily accessible from both of the Twin-Cities, either by motors or street cars. For information, call at our downtown office, 20-22-24 West 5th St., only a few doors from the St. Paul Hotel.

HOW WE SERVE YOU:

READ BEFORE ORDERING

ORDER EARLY. An early order enables us to give your requirements particularly good attention. Orders placed in advance of the actual shipping season can invariably be handled with greater care and precision than those reaching us in the midst of the planting rush.

OPEN AN ACCOUNT WITH US. New customers who desire to open accounts are asked to give the usual bank or commercial references. Accounts are due and payable by the 10th of the month following receipt of statement.

NO CHARGE FOR PACKING. Prices are always based on stock at our nurseries. Careful packing is done without charge.

SHIPPING INSTRUCTIONS. Please give directions how to ship (whether freight, express or parcel post) and best route where any preference. When not instructed we will use our best judgment. When shipments are receipted for as in good condition by the transportation company, our responsibility ceases. Any claim for damage or delay in transit should be made promptly to the delivering company who alone is responsible.

LIBERAL REPLACEMENT OFFER. Made because of our confidence in the vitality of our hardy Northern-grown plants. We agree to re-supply F. O. B. our nurseries at one-half of the original purchase price, any nursery stock purchased from us at catalog rates that may fail to grow the first season from causes other than abuse or neglect. This offer applies only to accounts that are promptly paid in full when due. Any labor involved in planting such replace orders is to be charged in full to the customer.

There are good reasons why plants may sometimes fail to grow well after transplanting. Poor soil, dried condition due to transportation delay, careless or improper culture, excessive drought, neglect, insect or disease attacks are some of the causes often to blame. After delivering plants in good order to your home or to the transportation company, it is obvious that we have no control whatever over these future conditions. It is not reasonable, therefore, to ask us, nor do we in any way agree, to guarantee the results or the outcome of plantings. Should any plant prove untrue to variety ordered we will replace it without charge, or refund the purchase price.

"HOME LANDSCAPES"—our name for this catalog—has been arranged to help you in your planning for more pleasure and enjoyment in your yard. We welcome the opportunity to give any further information you may desire.

A COMPLETE LANDSCAPE SERVICE

*Just the Kind of a Landscape Service
the Home Owner Likes*

MOST home owners we find are practical people. They are interested in a beautiful landscape setting for their home—a setting which is in harmony with the architecture of their house and which expresses their individuality.

They wish to secure such a setting in a practical, economical way without worries, or uncertainties. To accomplish all this seems like a big job, but Holm and Olson, with their complete landscape organization, are doing this over and over for many people. Their's is a *complete Landscape Service*, from planning with you, to actual construction and completion of the work.

You will find Holm and Olson service is a friendly service which tries above all to please. It is designed to meet every landscape need, from the smallest home and door yard planting to the vast estate and city park. Our skilled landscape architects plan "with" you rather than "for" you. Our planting service includes looking after every detail of planting from start to finish. Our equipment is complete and the work is under the direction of competent and experienced superintendents.

FOLLOW A PLAN FOR BEST RESULTS

Correct planning is an art. Even people of unquestioned good taste know that being able to appreciate beauty and being able to create or develop beauty are two distinct accomplishments. We suggest, therefore, that you use our facilities for the making of an adequate landscape plan for the development of your home. The plan may then be carried out step by step at each planting season, or the work done all at once. With the plan as a practical guide you will be assured of artistic, harmonious results with the minimum of expense.

CONSULT US —

OUR customers can receive expert landscape advice for improving their home grounds without extra cost. When plans and specifications are delivered a charge in the amount of ten per cent of the cost of the plants that are needed is made. Later on when your order for the plants is entered, a credit in the amount of the plan charge is shown on the order. This method enables us, by covering actual overhead expenses, to furnish worth-while landscape advice—something that will be of real merit and value to you.

For larger problems and for special trips and consultations, the charge for the landscape architect's services depends largely upon the time required. Cost estimates for this will be cheerfully given.

WE PLAN WITH YOU BY MAIL

If you live out of town, your landscape problem can very often be solved directly from our office with the help of such data as you can easily furnish. This eliminates the need or expense of a special trip. Full information will be given in response to your inquiry.

WRITE OR CALL US TODAY and arrange to have one of our representatives call.

EVERGREENS—The Aristocrats of the Garden

THE splendid form and color of evergreens is most keenly appreciated in the winter when by contrast their rich green gives a note of warmth and cheer to the cold winter landscape. This same characteristic beauty of evergreens gives them individual distinction even in the summertime. Their hardiness, their variation in form, color and habit make evergreens almost indispensable in any planting.

Our evergreens are given special care, handled carefully, and transplanted frequently to put them in the proper condition to be successfully moved from the nursery.

Our Landscape Service Department (see page 2) will be pleased to give suggestions and assist you in making suitable selections and pleasing arrangements in your evergreen planting.

An effective grouping of Blue Spruce and Mugho Pine.

CULTURAL NOTE. Leave a shallow depression around any newly planted trees. This helps retain the water. Never mound up the soil about the trunks except as a winter protection for deciduous trees. An occasional cultivation of the soil around the tree during the summer months will be of great aid to them.

WINTER GARDENS

DOES the pleasure and enjoyment of your garden end when the leaves fall in autumn? The home-grounds should be attractive and of interest the year round—right through the winter months—and the use of plant forms having winter beauty will accomplish this.

Evergreens. Pines, Cedars, Arborvitae and Spruces will give the needed green foliage background.

Bark and twig colorations of the Red- and Yellow-twigged Dogwood, Golden Willow and White and Yellow Birches give warmth.

Bright winter fruits and berries such as the Barberry, Highbush Cranberry, Matrimony Vine, Bush Roses, Snowberry, Bittersweet, Burning Bush, Honeysuckle, and Buckthorn give garden color and interest and furnish food for the birds.

Further details and suggestions for making the grounds attractive in winter will be given by our Landscape Service Department.

ORNAMENTAL SHRUBS for NORTHERN Gardens

We List Only the Most Hardy Varieties

MUCH of the beauty in the landscape planting of any home is supplied by shrubs. Their uses are legion and their cost is nominal. It is the softening grace of such shrubs as Spirea (in variety) Snowberry, Hydrangea, Barberry and others of like nature used about the angles and corners of the house, which makes the transformation from bareness to beauty. Tall shrubs, such as Lilacs, Honeysuckles, Mock-orange, etc., find their proper place in the border along the boundary or in plantings which serve to screen out unattractive views. In fact there is a place where most every type of shrub can be effectively used. By choosing carefully it is possible to have practically continuous bloom in the shrub border. A few of the colored twig sorts will liven up the planting in winter.

Our LANDSCAPE DEPARTMENT will gladly assist you in making your shrub selections. See catalog page 2.

RED-TWIGGED DOGWOOD.

HOW TO PLANT SHRUBS

Space the tall shrubs, such as Lilac, 4 to 6 feet apart; the medium-height shrubs, such as Bridal Wreath, 3 to 4 feet apart; and the dwarf growers, such as Barberry, 2 to 2½ feet apart. Dig the holes of ample size, place the plant and after filling in the hole two-thirds with top-soil, add water. Allow this to settle then complete the filling with soil up to the ground level. ALWAYS SHORTEN

BACK THE TOP GROWTH BY CUTTING AWAY AT LEAST ONE-THIRD THE LENGTH OF THE BRANCHES. Use no fertilizer excepting as a surface dressing.

Dogwood, Red-Osier (*Cornus stolonifera*). A native species with slender, red branches. White berries. 7 ft. Each

HOW TO TRIM SHRUBS

Unless located in a sheared hedge or in some very formal planting scheme, the flowering shrubs should be allowed to retain their natural shape and development. Continual pruning into globes and restrained outlines cuts away all the plant's natural beauty and individuality. The only good reason for pruning other than the prompt removal of dead wood is to keep the shrubs from spreading too wide and growing too tall for their positions. This corrective pruning is best done by cutting out the oldest and heaviest branches directly at the ground-line and doing a little top shortening if required. The early blooming varieties such as Bridal Wreath and Lilacs are better trimmed after their blossoming period, if one wants to enjoy that season's flowers. The later blooming varieties such as Hydrangeas, and Spiraea Anthony Waterer can be trimmed heavily in early spring with no loss of that year's blossoms, and with positive benefit to the growth.

Beautiful HEDGES

Do Well in this Section

WHAT can be finer than a living wall of green to mark the boundary of one's property? Hedges, through their adaptability to fill the need for attractive and ornamental barriers, have become immensely popular. The first cost is the last cost. Year by year they become more beautiful. A well kept hedge is always ornamental and a valuable asset to any home. Where a dense unpenetrable hedge is desired you have but to use Buckthorn or Cotoneaster.

BARBERRY, Thunberg's (*Berberis thunbergii*). Very satisfactory for a low hedge of close growth. Can be trimmed or allowed to grow naturally. Bears attractive red berries in the fall.

Per 10 Per 100

12 to 18 in.....	\$4.00	\$30.00
18 to 24 in.....	5.00	40.00
24 to 30 in.....	7.00	60.00

BUCKTHORN (*Rhamnus cathartica*). An ornamental plant of great hardiness that makes a dense hedge. Can be kept trimmed to any desired height or outline. Always satisfactory.

18 to 24 in.....	\$2.50	\$18.00
2 to 3 ft.....	3.00	22.00
3 to 4 ft.....	3.50	28.00
4 to 5 ft.....	5.00	40.00

COTONEASTER *acutifolia* (Quinceberry). A dense-growing shrub with dark-green, glossy, oval leaves. A splendid hedge plant for the Northwest. Perfectly hardy.

18 to 24 in.....	\$3.50	\$30.00
2 to 3 ft.....	4.50	40.00
3 to 4 ft.....	6.00	50.00

CURRENT, Alpine (*Ribes Alpinum*). A dense, low-growing plant with attractive green leaves. Makes a desirable low hedge.

12 to 18 in.....	\$5.00	\$45.00
18 to 24 in.....	7.00	65.00

Buckthorn makes a dense-growing hedge, dependable under northern climatic conditions.

HONEYSUCKLE (*Lonicera tatarica*). In addition to great hardiness the Honeysuckles have attractive flowers and berries. Suitable where a tall untrimmed hedge is wanted.

Per 10 Per 100

2 to 3 ft.....	\$5.00	\$40.00
3 to 4 ft.....	7.00	60.00

ROSA RUGOSA (Japanese Rose). Desirable for an open, untrimmed division hedge. Foliage and bright flowers are highly ornamental.

18 to 24 in., 2-yr. plants.....	\$6.00	\$50.00
---------------------------------	--------	---------

SPIRAEA vanhouttei (Bridal Wreath). The most satisfactory of hardy shrubs for use as a flowering hedge. Plant only where close trimming is not required.

2 to 3 ft.....	\$5.00	\$40.00
3 to 4 ft.....	6.00	50.00

PLANTING HEDGES

SET HEDGE TRIFLE LOWER THAN THEY WERE IN NURSERY TO GET A DENSE HEDGE AT BOTTOM
DIG ONE SIDE OF TRENCH STRAIGHT AND IN LINE, PLACE PLANTS AGAINST THIS SIDE TO GET A STRAIGHT HEDGE

HOW TO TRIM HEDGES

Immediately after planting, the tops of hedge plants should be cut back about one-third. This is most important to get the stock established. During the summer any straggly branches can be clipped to conform with the general hedge outline.

Each spring about April 1 the hedge can be trimmed back to the desired height and width. To insure an even cut it is well to stretch a line to serve as a guide. Regulation hedge shears should be used for the trimming. The hedges can be trimmed to either a round or square top outline.

HOW TO PLANT HEDGES

A trench should be dug where the planting is to be done, excavated to a depth of a foot, and 18 inches wide. Such a trench gives an even line to guide the planter. Discard any soil of poor quality and use surface loam. Varieties such as Japanese Barberry, Buckthorn and Cotoneaster, or those that are to be kept closely cut, should be spaced a foot apart in the row. In using Bridal Wreath or other open-growing

varieties which are not to be kept sheared, a spacing of 2 to 2½ ft. is proper. After planting, cut off at least one-third of the top of the plants to insure good lateral growth. Water thoroughly.

Information as to growth, selection or planting of hedges will be cheerfully given by our Landscape Department.

Our Hedge Plants will give a fine effect the first season.

Climbing and Clinging VINES

C LIMBING vines fill an important place in the planting of every home. Without them there frequently is ugliness and bareness. They will quickly drape themselves over suitable support or sprawl pleasingly over a wall or slope. Vines have beauty of leaf, flower and fruit. On new buildings they give shade quickly and are very cooling and cheerful.

There is a vine for every purpose. Engleman's Ivy will climb and cling to brick and stone. Bittersweet winds itself around small trees, posts and trellis and its berries are marvelous. The Purple and White Clematis climb on wire and trellis to yield a great display of lovely flowers, and the Beta grape, which is absolutely hardy here, will cover a pergola or trellis and bear edible fruit.

PLANT A ROSE GARDEN

This most beautiful flower can be successfully grown in northern gardens. Our stock includes the finest specimens of those varieties which have proven the most adaptable to our climate.

Our landscape department will help you plan and arrange a rose garden. Everyone who has any space at all should grow a few roses.

Our complete stock of fine rose varieties is listed on pages 31 and 32.

Plant Engleman's Ivy to cling on a brick or stucco chimney.

THIS CHART MAKES it EASY to PLAN Your BORDERS

In the table is given height of growth and color and season of bloom of the more popular flowering perennials. The data has been compiled from actual Minnesota gardens. It will be easy to group flowers in harmonious color arrangements by following this chart. Naturally the lower growers should be placed near the front of the border.

HARDY PERENNIAL FLOWERS

THE Perennials persist over winter and renew their growth with increased vigor in the spring. Their first cost is small, so that one can enjoy a good assortment at a modest outlay. When you consider their tendency to be permanent, giving flowers year after year with only minimum care, then their really small expense yet exceedingly great value is apparent.

Soil and Planting. Perennials are best arranged in beds or borders with varieties selected so that there will be some in bloom at all times. The time of blooming is given in the descriptions. The soil should be well worked up and fertilized if necessary. Surface cultivation of the ground between the plants should be practiced. A location free of tree roots and dense shade is desirable.

Note. The development of perennials after planting is dependent upon soil, moisture, location and many such factors over which we have no control. Our customers can feel sure of receiving from our nurseries the best grade of stock, properly handled and packed, but should not expect us, nor do we agree, to assume responsibility as to the outcome of their plantings or to make replacements without charge.

Quantity Rate. Ten or more plants of a variety will be supplied at 5c less per plant. Example: Plants priced at 35c each are \$3.00 for ten.

IRIS (Fleur-de-Lis)

The Hardy Garden Orchid

HAT is more lovely in springtime than the bloom of a mass of Iris along a walk or in the border?

Iris is so generally considered as one of the most beautiful of perennial plants as to rightly deserve its common name—"The Hardy Orchid." For cutting use, as house and table decorations, the Fleu-de-Lis is highly desirable. Stalks of flowers, cut when in bud, often last a week in doors.

PLANTING. Set the roots only deep enough to have them covered with soil and avoid any fresh manure as a fertilizer.

PRICES. The 1-year plants are strong, thrifty roots; the 2-year stock is heavier and will produce results more quickly.

Quantity Rate. Ten or more of a variety will be supplied for 5c less per plant. Example, plants priced at 35c each are \$3.00 for ten.

NOTE. In the descriptions "S" or "Standards" refer to the three upright petals. The letter "F" or "Falls" refers to the three drooping or lower petals.

PEONIES—The Flower of the Great Northwest

A FEW choice plants of PEONIES will fill your garden with color and fragrance from late May through June. Even the rose cannot excel in beauty and charm the flowers of the modern Peony. Here, under our northern conditions, it is peer of all flowers in combining so well the qualities of absolute hardness, great color variation, size, beauty and fragrance of bloom.

PLANTING. The roots should be set with the "eyes" 2 to 3 inches below the surface and the soil tightly packed about them. Allow a spacing of about 3 feet between the plants.

The soil should be of good substance and the location free of tree roots and dense shade. Bone meal is preferred as a fertilizer. A light covering of straw, after the ground has frozen is desirable.

NOTE. The figures directly following the variety name denote the comparative rating by votes of the American Peony Society in 1925. The valuation is on a scale of 10 as the perfect score. Any variety given a rating of 7.0 and over can be considered as highly desirable. We list only those sorts suitable to our northern conditions and that have proven their value as producers under ordinary garden culture.

QUALITY. The "roots" are substantial plants with 3 to 5 strong eyes. The "clumps" vary in size but are the 2- to 4-year old stock. These older plants are desirable when immediate flowering results are wanted.

PHLOX—All Hardy Varieties

The Most Beautiful of the Late Summer Flowers

PHLOXES are very hardy floriferous perennials that give bold, brilliant color effects from July to frost. They can be had in pure white, pink, lavender and crimson and in varying combinations of these colors. Filling in, as they do, the period between the late spring and fall blooming plants when the general garden bloom is not abundant, they are practically indispensable to the well-arranged planting.

WHERE TO PLANT. They are exceedingly attractive when planted in masses of a single kind in a bed or border. Their midsummer bloom makes them a most valuable addition to beds where such spring-blooming plants as Iris, Peonies, Poppies, etc., are located.

CULTURE. Phloxes are gross feeders and react quickly to plenty of rich soil and to abundant watering in dry seasons. The old clumps should be divided and re-planted at least every fourth year.

QUANTITY RATE. Ten or more plants of a variety will be supplied at 5c less per plant. Example: Plants priced at 35c each are \$3.00 for ten.

B. Comte. Bright purplish crimson with satiny sheen. Medium height. 35 cts.; 2 yr., 50 cts.

Baron Von Dedem. Large trusses of brilliant scarlet, blood-red flowers. 35 cts.; 2 yr., 50 cts.

Bridesmaid. Tall, with flowers of pure white, with large, crimson-carmine eye. 35 cts.; 2 yr., 50 cts.

Champs Elysees. Large trusses of dark crimson-purple. 35 cts.; 2 yr., 50 cts.

Dr. Konigshofer. Brilliant orange-scarlet, with dark blood-red eye. Medium height. Mid-season. 60 cts.; 2 yr., 75 cts.

Elizabeth Campbell. Very large spikes, with flowers of quite a new color—light salmon changing to pink in the center. 50 cts.; 2 yr., 75 cts.

Eugene Danzanvillier. Soft lavender shading lighter to center. 40 cts.; 2 yr., 60 cts.

Frau Anton Buchner. Undoubtedly the finest pure white Phlox which has as yet been raised. Large flowers of perfect form. 35 cts.; 2 yr., 50 cts.

F. G. Von Lassburg. Purest white; individual flowers very large. Tall, mid-season. 35 cts.; 2 yr., 50 cts.

General Van Heutz. Brilliant salmon red, with white center. 35 cts.; 2 yr., 50 cts.

Miss Lingard. The most popular white. Immense heads of white flowers in late June and again in Sept. 35 cts.; 2 yr., 50 cts.

Mme. Bezanson. Rich crimson, medium height. 40 cts.; 2 yr., 60 cts.

PHLOX Subulata. An early spring-flowering type which during the flowering season is a mass of bloom. An excellent plant for the rockery and border, and invaluable for carpeting the ground or covering graves.

Rosea. Pink. 25 cts.; 2 yr., 40 cts.

Alba. White. 25 cts.; 2 yr., 40 cts.

PERENNIAL PHLOX.

ROSES

The Queen of Flowers

AN EXPERIENCE of real pleasure is in store for those who have never grown roses. That the fragrance and beauty of roses can be enjoyed in our northern gardens is now a proven fact. It is needful, however, to plant only the hardier sorts and to provide winter protection. Our list contains both old and new varieties that through actual test have shown real merit.

PLANTING SUGGESTIONS. Make the rose bed in rich soil in a sunny, warm location free of tree roots. Bone meal and well-rotted manure are excellent fertilizers.

WINTER PROTECTION (for all but "Rugosas" and "Bush Roses"). In late fall heap up the ground around the base of the plants to 12 inches. After freezing weather bind the tops with dry straw and mulch the bed with straw or leaves. A top covering of tar paper over the bushes keeps out moisture. Climbing Roses should be laid prone, covered with 12 inches of soil and a top of tar paper.

HYBRID TEA ROSES MONTHLY OR EVERBLOOMING

As a group these roses are not as heavy growing nor as hardy as the Hybrid Perpetuals. Careful winter covering is essential. Their rich coloring, fragrance and long blooming season make them very popular.

To insure maximum results we offer potted H. T. Roses—all strong 2 yr. plants that are started and growing when you get them.

Price—\$1.50 each (except where noted). **2 yr.,** growing, potted plants.

DELICIOUS FRUITS

For Yard or Garden

*Know the joy of harvesting your own fruit off of your own place.
Fruits are easy to grow.*

THE planting of fruit trees and berry bushes in the home yard is a practical and worth-while investment. The fruit trees not only give desirable shade, but further repay the planter for their modest cost by their beautiful masses of spring flowers and their yield of fruit.

The berry bushes and grapes take up so little space that every yard can easily accommodate enough plants to supply practically all the luscious fresh fruit that is wanted. Years of experience in growing fruit in Minnesota permits us to recommend the following varieties as reliable and sturdy sorts for our Northern conditions. We welcome your inquiries as to fruit culture and care.

H. & O's High Test Grass Seed

ing good grass seed on fertile, prepared soil and bestowing a reasonable amount of after-care and consideration on its upkeep.

Soil Preparation must be thorough. Plow or spade, grade and lastly pulverize the surface. Any fertilizer used should be worked well into the ground.

Seeding. The best quality seed costs only a few cents more per pound than unreliable, cheap mixtures. Use the best obtainable and realize the most from your work and planting. Sow one pound to every 200 square feet of area. Sow evenly, rake lightly and water thoroughly.

Watering, when required, should be sufficient to soak the soil. Light sprinklings are harmful.

Our book, "The Principles of Lawn Making," will be sent, without charge, on request.

(Note. Add 8c per pound to prices listed on all grass seed wanted by Parcel Post.)

VELVET-SOD MIXTURE

A very high grade mixture of those hardy grasses that will combine to make a beautiful and lasting lawn. Especially prepared to withstand our Northern climatic conditions. Its weight, over 20 pounds per bushel, clearly indicates its purity and freedom from chaff and adulteration. We use this mixture on all our landscape contracts and recommend it highly.

Lb., 55 cts. 5 lbs., \$2.50 10 lbs., \$4.75 20 lbs., \$9.00

SHADY-SIDE MIXTURE

By using this seed it is possible to get a growth of lawn under trees and in shady places where the ordinary grasses will not grow. Has always proven satisfactory for such positions.

Lb., 60 cts. 5 lbs., \$2.75 10 lbs., \$5.30 20 lbs., \$10.00

TERRACE MIXTURE

A special mixture of spreading, deep-rooting grasses that will thrive and hold the soil on terraces and slopes. It is very resistant to drought and poor soils and gives results where the ordinary grasses fail.

Lb., 55 cts. 5 lbs., \$2.50 10 lbs., \$4.75 20 lbs., \$9.00

SOW VELVET-SOD MIXTURE—The best seed obtainable.

You can have the finest lawn in your block—Ask our gardener.

WHITE CLOVER

The best Clover for lawn uses because of its small leaves and dense, close growth. It is often sown on new lawns for its protection to the tender grasses the first year. Admired by many for its fragrant dainty flowers.

½ lb., 40 cts. 1 lb., 75 cts. 5 lbs., \$3.60 10 lbs., \$7.00

KENTUCKY BLUE GRASS

A beautiful grass that should be the main constituent of every good lawn here in the North. Sometimes used alone, but becomes better established if sown in mixtures. Our seed is choice grade carefully re-cleaned of the high average weight of 21 lbs. per bu.

Lb., 50 cts. 5 lbs., \$2.35 10 lbs., \$4.50 20 lbs., \$8.50

FERTILIZERS

For Lawn and Garden

Old lawns often become spotted in appearance—the grass losing its fresh green color and drying out in patches. This condition indicates that a plant food is needed, that the grass roots are starving. An application of our prepared fertilizer—inexpensive, free of weed seeds and easy to handle, will give the lawn new life. It is good practice to broadcast a fertilizer dressing over the lawn each spring and so keep the grass healthy and vigorous. Always wet down the grass with the hose after spreading the plant food.

SPECIAL LAWN FERTILIZER. A mixture of the best plant foods that will revive the grass growth and add nourishment. Sow evenly using 25 pounds per 1,000 square feet.

10 lbs., \$1.00 50 lbs., \$2.25 100 lbs., \$4.00

BONE MEAL. A splendid fertilizer for Roses, Peonies, flower or shrub beds. High phosphate content. Frequently used on the lawn (30 pounds to 1,000 square feet).

10 lbs., \$1.00 50 lbs., \$2.25 100 lbs., \$4.00

HARDWOOD ASHES. Valued as a lawn fertilizer because of its high potash content. Use 40 pounds per 1,000 square feet.

10 lbs., 75 cts. 50 lbs., \$1.75 100 lbs., \$3.00

SHEEP MANURE (Pulverized). A quick acting plant food for general use about the lawn, flower beds or garden. For lawns use 30 pounds per 1,000 square feet and wet down. This is a pure, natural manure rich in nitrogen and potash and free of weed seeds or litter.

10 lbs., 75 cts. 50 lbs., \$1.75 100 lbs., \$3.00

NITRATE OF SODA. The cheapest form in which to apply nitrogen stimulant to plants encouraging quick, green growth. Not a general plant food. For lawns sow 8 pounds to 1,000 square feet and wet down.

10 lbs., \$1.25 50 lbs., \$4.50 100 lbs., \$8.00
